Position Title: Engineering Technician

Department: Manufacturing

Position Description

TruNorth Automation is looking to grow its manufacturing department. As an Engineering Technician, you will be responsible for bringing high-precision automated solutions to life. Working closely with our engineering team, this role includes leading all aspects of the mechanical and electrical assembly, field wiring, alignment, and setup of our custom-designed equipment. You are joining a highly driven and ambitious team with decades of experience in delivering high-end automated equipment, and you will be vital in our efforts to deliver exceptional quality to our customers.

You Will Succeed if You:

- Are self-driven and energetic, motivated to meaningfully contribute from day one, and be part of building the company's experience and culture
- Have a high level of attention to detail and quality of workmanship
- Desire to work in a fast-paced and growing company, delivering world-class equipment with innovative technology

Qualifications

- High School or Technical School Diploma
- Associate degree in Engineering Technology, Automated Systems & Robotics, or equivalent preferred
- Hands-on experience with power and hand tools, specialized tooling, machine building, mechanics, and electronics
- Ability to read electrical and pneumatic/hydraulic instrumentation & wiring schematics
- Hold effective interpersonal and communication skills
- Work well both individually and in teams
- Able to travel by air or car (estimated 10% max.)
- US citizen or authorization to work permanently for any Employer in the United States
