

Position Title: Project Manager

Reports to : Chief Operations Officer (COO)

Position Description:

TruNorth Project Managers play a critical role in helping drive custom automation projects from time-of-order through install. Working within teams of engineers & technicians, the PM is responsible for primary customer communications, managing project scope/schedules/budgets, planning labor requirements, lending technical advisement & expertise, and doing whatever it takes to ensure our commitments to customers are being met.

Guidelines for Success:

- High level of ownership & accountability for self & project team members
- Excellent communication skills over a broad audience
- Strong organizational skills & ability to manage multiple projects simultaneously
- Willingness to participate in technical problem solving
- Leadership skills and commitment to personal & company growth

Qualifications:

- Bachelor's degree in related engineering field
- 5+ years' technical experience in automation project work
- Additional project management experience a plus
- Proficiency with Microsoft office or other scheduling software
- Knowledge of Solidworks, PLC programming, or equipment design preferred
- US Citizen or qualified to work for any employer in the United States

Benefits:

- Competitive compensation including 401k plan with company match
- Health, Dental, & Vision insurance coverage
- Professional career & leadership development opportunities
